

## G 20 P

### Cleaner in powder form for industrial dishwashers

Item no. 2100

**G 20 P** is the all-purpose and economical cleaner for

- kitchen, coffee and canteen dishes,
- persistent fat, protein and starch deposits,
- problematic coffee, tea and lipstick staining.

**G 20 P** convinces the ambitious consumer through

- optimum performance for all water hardness conditions,
- brilliant results at lowest dosages,
- streak- and spot-free shine without wiping.

#### Areas of application and recommended dilution:

**1:250 – 1:500**

G 20 P is well suited for all types of industrial dishwashers and all water hardness conditions. Harmonises ideal with the rinse agents K 20 F (Item no. 2140) and K 50 FN (Item no. 2145).

Depending on the soiling and water hardness, dose 2-4 g G 20 P per litre (0,2 – 0,4% in solution).

#### Characterisation:

##### Appearance:
