

DS 2000

Acidic foam-cleaner for foodstuff areas

Item no. 2245

DS 2000

- is ideal for acidic cleaning in all food-processing businesses
- cleans commercial kitchens, canteens, bakeries and butcheries
- also suitable for hospitals, nursing homes and public swimming pools

DS 2000

- takes care of grease, protein residue, dirt, lime-scale and soap scum with active foam
- removes the causes for bacterial growth and their habitat
- is high-foaming, the use of a foam gun is recommended

Areas of application and recommended dilution:

surfaces with high degree of soiling diluted 1:33 to 1:50

surfaces with low degree of soiling diluted 1:50 to 1:200

Apply product with a foam gun or foam lance. Allow foam to take effect for at least 15 minutes before rinsing with clear water. If a higher dilution of product is utilized, an increased time of exposure is necessary for ideal results.

Best for cleaning of floors, walls and other surfaces.

Characterisation:

Appearance:

Colourless liquid with characteristic smell.

Ingredients:

Preparation from cationic surfactants, organic acids and auxiliaries.

Free of colour and perfume.

pH value:

Acidic.

All ingredients are biologically degradable.
