

INSEKT-EX

Insecticide

Item no. 2280

INSEKT-EX is a highly effective, mild smelling insecticide for

- gastronomy, hotel business, community catering,
- hospitals, nursing homes and kindergartens,
- libraries, storage rooms and mews.

Due to its unique spectrum of efficiency **INSEKT-EX** shows

- success against all types of creeping and flying insects,
- long lasting, insect dispelling effect,
- high efficiency without sharp smells.

Areas of application:

Infestation (surface)

Apply with a compression sprayer (e.g. 1,5 l compression spraying bottle) undiluted on the related surfaces. Treat chinks and edges especially careful. Do not spray on hot surfaces!

Infestation (room)

Atomise 2-3 l INSEKT-EX per 500 m³ in the related room. Keep doors and windows closed for 6-8 hours. Take care for good ventilation after treatment.

Preventive

Depending on the season, spray several times weekly on vulnerable places.

Characterisation:

Appearance:

Yellow liquid with a characteristic scent.

Ingredients:

Preparation from pyrethroids and synergistic compounds in a mixture of aliphatic hydrocarbons. Harmful effects are unlikely in appropriate applications.

The active ingredients are biologically degradable.
