

RF 2000

Self-acting drain pipe cleaner

Item no. 2400

RF 2000, the liquid, high concentrated drain pipe cleaner

- quickly and thoroughly dissolves fats, proteins and food remains,
- dissolves hair, cellulose and soap deposits,
- harms neither piping nor sealing material.

RF 2000 is especially suitable for kitchen and sanitary areas

- removes pipe blockages in minutes,
- does not produce poisonous or explosive vapours,
- actively prevents new blockages.

Areas of application and recommended dilution:

1:3 cleaning of drain pipes in kitchen and sanitary areas

Mix 1 part RF 2000 with 3 parts hot water (90-95 °C) and pour it in the blocked drain. A higher dosage does not increase the efficiency. Depending on the blockage, let it act between 5 to 30 minutes and rinse afterwards with fresh water. Significant longer residence times may harm already damaged pipes. Do not apply the product to aluminium or varnished surfaces.

1:5 preventive drain pipe treatment

pour the hot, diluted product (20%) in the drain pipes weekly as a preventive action. Let it act for 15 minutes and rinse afterwards with plenty of fresh water. For the preventive treatment of fatty drain pipes in kitchens, we recommend GERUCH-EX (Item no. 2080), the natural grease decomposer on orange oil basis.

Hot water increases the cleaning power!

Characterisation:

Appearance:

Yellow-brown liquid with a mild scent.

Ingredients:

Preparation from natural tensides, alkalis and auxiliaries in water.

pH value:

Alkaline.

RF 2000 is free of chlorine, hydrogen forming or oxidising agents.

All ingredients are biologically degradable.
