

## ALK-DES

Alcohol disinfection

Item no. 2790

**ALK-DES** is applied for the safe disinfection of all surfaces in

- hotels, catering services and food industries,
- clinical and medical laboratories,
- and all over there, where aseptic surfaces are being required.

**ALK-DES** shows fast efficiency without additional aldehyde

- against bacteria, fungi and viruses,
- is based upon a combination of approved food additives,
- well suited for spraying and wiping application.

### Areas of application and recommended dilution:

#### Undiluted

Apply ALK-DES evenly on the cleaned surface in a wiping application with a clean cloth or with a spraying bottle and let the surface dry.

ALK-DES wipes off completely within minutes and leaves an aseptic surface.

The required quantity is 40 – 50 ml/m<sup>2</sup>.

ALK-DES is not suited for acrylic surfaces like Plexiglas (risk of stress cracking). For this purpose we recommend the proven disinfection cleaner SUN-DES, Item no. 2730.

#### Characterisation:

##### Appearance:

Colourless liquid with a smell of alcohol.

##### Ingredients:

Preparation from disinfectants and alcohol in water.

Free of AOX, CKW, aldehydes, acids or alkalis.

##### pH value:

Slightly acidic.

All ingredients are biologically degradable.

This product data sheet has been created according to the most current standard of technology. We do however not guarantee for correctness and completeness. No liability for damages due to improper application. update July 2015
