

MONIL®-KON

Safe preserving agent for car wash facilities

Item no. 4120

MONIL®-KON is the ideal drying agent for all car wash facilities with blower installation

- brilliant – due to its shine-effect vehicles appear like polished,
- gentle – a protection film preserves even heavily used varnish,
- highly concentrated – therefore extra economical in use.

MONIL®-KON is the preserving agent with safe effect

- for fast and thorough drying,
- causes spontaneous water break-up and bead-off,
- prevents dangerous greasy films on windshields.

Areas of application and recommended dilution:

1:300 – 1:500

Fill in the product in the dosage device of the car-wash facility and adjust the favoured concentration. MONIL®-KON should be prediluted with water at a ratio 1:3 for some facilities. MONIL®-KON does not leave adherent, greasy films on windshields or wipers and prevents from dangerous driving situations due to poor visibility. A thin, hydrophobic film will be fast removed by the windscreen washer system of the vehicle.

Optimal results will be achieved in combination with HWR-safety cleaners for

- ☞ pre-wash:
- ☞ main-wash:

AKTIV-SCHAUM, Item no. 4090
MONIL®-SHAM, Item no. 4100
