

## MONIL®-AS

Industrial cleaner low-foaming with anticorrosive  
Item no. 4160

### MONIL®-AS

- is the ideal industrial cleaner for parts cleaning systems and cleaning machines
- is used wherever foaming has to be avoided
- contains special anti-corrosion additives that also protect aluminum parts

### MONIL®-AS

- can also be used in high pressure plants in warehouses and workshops
- easily dissolves oil residues, fats and other industrial dirt
- is suitable for preparation of lacquering

## Areas of application and recommended dilution:

**1:5 – 1:20**

### Cleaning of parts

Clean the dirty parts by dipping, wiping or in ultrasonic baths, rinse afterwards with fresh water. The treated surfaces are completely free of grease and are prepared for varnishing. For the cleaning of aluminium parts in closed and open cleaning machines, we recommend to use a concentration of 1:14 (approx. 7%).

**1:20 – 1:100**

### Maintenance cleaning

Dilute the product, depending on the pollution and clean the dirty surfaces, parts or plants as usual by wiping, spraying or with a cleaning machine.

Hot water increases the cleaning power.

## Chemical characterisation:

### Appearance:

Colourless liquid with a mild scent.

### Ingredients:

Preparation from alkalis, builders, corrosion inhibitors and auxiliaries in water.

Free of AOX, formaldehyde and solvents.

Fast separating in oil separators.

### pH value:

√ 14: strongly alkaline
