

KORPHOS

Rust remover

Item no. 4220

KORPHOS is the powerful rust remover for industrial use

- rust, lime and mineral deposits are dissolved,
- composed ingredients dissolve fats, oils and waxes.

KORPHOS works reliably

- on corroded steel, stainless steel and iron parts,
- and leaves fat-free surfaces.

Areas of application and recommended dilution:

1:3

Immersion bath

Dilute KORPHOS and dip the related parts in the immersion bath. Depending on the corrosion category, let it act for a few minutes up to several hours. Treat residues with a scrubber or, if necessary, repeat the procedure until the last residues are removed. To avoid the formation of rust film, do not rinse the parts with fresh water. Otherwise the clean parts should be treated at once with stainless steel care GLANZ-S (art. 2180) after rinsing and drying.

Wiping or spraying method

Apply the diluted product on corroded areas, let it act for a few minutes and proceed as described above.

Characterisation:

Appearance:

Yellow liquid with a scent of alcohol.

Ingredients:

Preparation from tensides, alcohols, inorganic acid, corrosion inhibitors and auxiliaries in water. Free of AOX, hydrochloric acid and formaldehyde.

pH value:

Acidic.

All ingredients are biologically degradable.

This product data sheet has been created according to the most current standard of technology. We do however not guarantee for correctness and completeness. No liability for damages due to improper application. update July 2015
