

HAND-SAFE

Hand protection foam or lotion

Item no. 4450

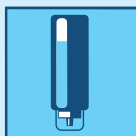

HAND-SAFE

- is applied before work to protect the skin from stress
- protects the skin against water and oil soluble irritants
- absorbs quickly and makes the skin smooth and supple

HAND-SAFE

- is the professional skin protection for every skin
- is used in every industry, whether food processing or handicraft
- is used to prevent occupational skin diseases

Areas of application and recommended dilution:

Spray HAND-SAFE almost as large as a walnut on your hands before you start to work, massage the foam into the hand surfaces and leave to take effect for 2 minutes. Do not forget thumbs, nails and nail-beds! Repeat the procedure according to use and need once to several times daily. One aerosol can is adequate for approx. 160 applications.

For hand-washing, hand-disinfection and skin care, we recommend:

- | | |
|-----------------------------------|---|
| – HAND-CARE 24 (item no. 2776) | skin care lotion with allantoin and vitamin E |
| – HWS rose (item no. 2780) | liquid soap, extra mild |
| – HWS vanille (item no. 2785) | liquid soap, extra mild |
| – HÄNDE-DES fluid (item no. 2773) | hand-disinfection, DGHM attested |
