

BITU-EX

Strong adhesive bitumen and tar solve

Item no. 4500

BITU-EX powerfully removes heavy soiling of

- asphalt deposits, bitumen, grease, oil, soot residues and tar,
- new formula guarantees for optimal soil penetration,
- excellent adhesion of the emulsion on vertical surfaces.

BITU-EX is all-purpose and offers many advantages

- is used diluted with water – therefore especially economic,
- mild orange smell – therefore conveniently applicable,
- free of acids, alkalis, aromatic und chlorinated solvents.

Areas of application and recommended dilution:

1:3 – 1:5

In order to generate the adhesive emulsion BITU-EX is mixed with water and applied by a compression sprayer. The mixture should be shaken well for a few seconds for the manual application by brush or paint-brush. After 5 – 10 minutes of penetration time the object should be hosed down with high pressure unit or washed off with water.

A dilution up to 1:8 is applicable in case of light soiling.

Characterisation:

Appearance:

Yellow liquid with a pleasant smell of orange.

Ingredients:

Preparation from non-ionic tensides, fatty alcohols, aliphatic hydrocarbons and native orange oil.
Free of acids, alkalis, aromatic and chlorinated hydrocarbons.

pH value:

Neutral (in aqueous solution).

This product data sheet has been created according to the most current standard of technology. We do however not guarantee for correctness and completeness. No liability for damages due to improper application. update July 2015
