

MONIL®-PLUS flüssig

Liquid concentrate to raise the pH-value

Item no. 4730

MONIL®-PLUS flüssig is the safe way to raise the pH value

- economical usage,
- compatible with chlorine, bromine or other germ-killing procedures,
- recommended for full-automatic control and dosing systems.

MONIL®-PLUS flüssig is suitable for use in

- indoor and outdoor swimming pools,
- fountains and well systems,
- industrial water cycles.

Areas of application, mode of action and recommended dilution:

MONIL®-PLUS flüssig is suitable for all swimming pools with fullautomatic control and dosing systems, e.g. in hotels, housing estates and municipal businesses.

Basis for successful pool water treatment is a proper adjusted pHvalue between 7.0 and 7.4. Decreases the pH below 7.0, the dosage of

MONIL®-PLUS flüssig will increase the pH-value again. 10 ml MONIL®-PLUS flüssig per m³ are necessary to raise the pH 0.1 unit.

With a full-automatic control and dosing system, the pH-value may be conveniently and continuously raised.

For disinfecting pool water, we recommend the ready to use water disinfectant concentrate CHLORO-DES (Item no. 4740).

For the effective flocculation of pool water, we recommend MONIL®-FLOC SB (Item no. 4734).

Characterisation:

Appearance:

Colourless scentless liquid.

Ingredients:

Preparation from sodium hydroxide in water.

pH value:

Alkaline.

This product data sheet has been created according to the most current standard of technology. We do however not guarantee for correctness and completeness. No liability for damages due to improper application. update July 2015
