

MONIL®-KE fluid

Liquid cold lacquer remover

Item no. 4752

MONIL®-KE fluid is a special product to remove paint

- dissolves synthetic paint, emulsion paint, primers and graffiti,
- gentle to metal, wood, concrete and other mineral substances,
- recommended to be used in immersion baths to remove paint.

MONIL®-KE fluid is safe and reliable

- guaranteed free of poisonous substances and CKW (e.g. methylene chloride),
- removes several layers of paint in one process,
- for use in paintshops, workshops and craft businesses.

Areas of application and recommended dilution:

Undiluted

MONIL®-KE fluid is suitable to remove paint from small and big parts, e.g. spray guns and paint spraying pistols, strike plates, paint rolls, rims etc.

Depending on the type of lacquer, let it act for 5 – 30 minutes in the immersion bath and abrade afterwards with a scraper or jerk off with a high pressure cleaner. Do not warm the immersion bath and keep it as possible closed. Keep away from sources of ignition – No smoking. Use only in well ventilated areas.

MONIL®-KE fluid was developed for the gentle removal of paint from solvent resisting parts in an immersion bath. Do not apply on synthetic materials or plastic parts, they may be harmed!

Your HWR-partner on site advises you to a custom-made solution which meets your requirements.

Characterisation:

Appearance:

Colourless liquid with a characteristic odour.

Ingredients:

Preparation from tensides, water soluble solvents and additives.

pH value:

Neutral (in aqueous solution).
