

## ULTRA-POLISH

### Car polish and high gloss sealant

Art.-No. 4900

**ULTRA-POLISH** is the ideal system maintenance

- for car, motorcycle, caravan, boat, aircraft and all varnished surfaces.
- for cleaning and preservation on all types of paints (coloured, nitro or metallic paint).
- the UV-stable sealing is dirt- and water-repellent.

**ULTRA-POLISH** is manually and mechanically easy to apply

- without clouds and stripes or formation of holograms.
- effectively protects the paintwork from aggressive environmental influences.
- refreshes the colours, seals the car paint and delays the re-soiling.

#### Recommended application:

Wash the car first before polishing. Shake ULTRA-POLISH well and apply with a soft cloth in thin layers. Then carefully polish the surface with a microfiber cloth to achieve a high gloss finish, possibly use a polishing machine.

Do not apply on hot surfaces or under direct sunlight.

ULTRA-POLISH is particularly recommended with burnt bird droppings, tree resins, crusted mosquitoes and other soiling.

#### Characterisation:

##### Appearance :

Milky liquid with mild fragrance.

##### Ingredients:

Under 5 % nonionic surfactants, 15 – 30 % aliphatic hydrocarbons, care components (special silicone oils and waxes), polishing agents, preservatives (Methylisothiazolinone, Methylchlorisothiazolinone) and fragrance.

##### pH value:

Slightly alkaline.

All ingredients are biologically degradable.

This product data sheet has been created according to the most current standard of technology. We do however not guarantee for correctness and completeness. No liability for damages due to improper application. update Aug. 2018
