

SILVER-LUB

Special lubricant – lead free – silver coloured

Item no. 5020

SILVER-LUB 1000 is the high performance lubricant for the toughest standards

- unbeatable in adhesion and lubrication,
- high pressure and temperature resistance,
- neutral with metals, varnish, rubber and plastics.

SILVER-LUB 1000 is the multi-purpose assisting agent in workshops

- prevents the seizing-up of screws and nuts,
- for long-lasting lubrication of bolts and windings,
- for use under extreme pressure and temperature impact.

Areas of application:

SILVER-LUB 1000 is well suited for the lubrication of screws, bolts and windings, which are exposed to extreme pressure- and temperature impact and corrosion.

SILVER-LUB 1000 is temperature resistant from -30°C up to $+350^{\circ}\text{C}$, short-term resistant up to $+1000^{\circ}\text{C}$.

The superfine pigments of copper allow an effective lubrication with simultaneously high adhesion. Screws may be easily released, even after several years of stress.

Corroded screws may be released in combination with the high performance rust-releasing agent HLR-SUPER (Item no. 5030), in most cases, where other methods are failing.

Characterisation:

Appearance:

Silver coloured paste with a scent of mineral oil.

Ingredients:

Preparation from a mixture of mineral oils, superfine copper- and aluminium-pigments and slip agents. Free of CFC and lead.
