

TB 2000

Parts and brakes cleaner

Item no. 5300

TB 2000 is a fast and deposit-free self-drying special cleaner

- for scouring parts and fine parts in the industry,
- in paint shops for scouring prior to base coating and painting,
- in the car industry for cleaning brakes.

TB 2000 is safe and reliable

- removes not only fat and dirt but also silicone deposits,
- dissolves most paint at appropriate residence time,
- does not harm glass, ceramic, metals, rubber and many plastics.

Areas of application and recommended dilution:

Undiluted

Apply TB 2000 by dipping, spraying, wiping or with a brush. If necessary, repeat the procedure.

TB 2000 finds also application in workshops to clean disc brakes, brake pads, drum brakes or other parts of brakes. Rubber sleeves are normally not harmed. Anyhow we recommend to check the compatibility with synthetic materials and rubbers.

To remove paint from small parts, filters or grids use an immersion bath with enough residence time (over night) and blow off with compressed air or use the cold lacquer removers MONIL-KE fluid (Item no. 4752) or MONIL-KE gel (Item no. 4753).

Characterisation:

Appearance:

Colourless liquid with a smell of ether.

Ingredients:

Preparation from benzines, alcohols and ethereal solvents.

Free of CHC and CFC.
