

Orgaferm®-Spot

Biotechnological oil stain remover

Item no. 8590

Orgaferm®-Spot is the gentle alternative to aggressive chemicals

- includes for the biodegrading of oil stains developed micro organisms,
- hydrocarbons and mineral oils are broken down into CO₂ and water.
- Guaranteed free of harmful, toxic or genetically modified contents.

Orgaferm®-Spot powerfully removes in an environment-friendly manner

- persistent oil stains from all surfaces made of concrete or asphalt,
- in petrol stations, parking sites, workshops or garages.
- Innovative cleaning technology for trade, craft and industry.

Areas of application and recommended dilution:

Undiluted

Absorb large spillages of oil with an absorbent material like OELBINDER (Art. 4780) and take up mechanically. Shake well before use and apply Orgaferm®-Spot undiluted on the surfaces, which have to be treated. 1 litre is adequate for up to 10 m² of surface. Brush or treat the oil stain with a scrubbing-brush and let it act for at least 20 minutes. Rinse afterwards with plenty of water. In case of porous surfaces, repeat the treatment if necessary.

Protect from freezing and temperatures exceeding 45 °C.

Characterisation:

Appearance:

Yellow liquid.

Ingredients:

Preparation from biodegradable surfactants, natural bacterial cultures and auxiliaries in water.

pH value:

Neutral.

The included natural bacterial cultures are solely conform with genetically not modified, not pathogenic strains of class 1*. Cultures of yoghurt belong to the same class.

* Classification according to the European association of biotechnology (EFB).

This product data sheet has been created according to the most current standard of technology. We do however not guarantee for correctness and completeness. No liability for damages due to improper application. update Oct. 2021
