

FLÄCHEN-DES

Liquid Surface Disinfectant

Item no. 2729

FLÄCHEN-DES

- is a mild and powerful ready-to-use disinfectant with outstanding material compatibility
- is effective against broad spectrum against bacteria, yeast and selected viruses
- is free of aldehydes, fragrances and dyes

FLÄCHEN-DES

- is perfect for use around home, bathroom, athletic facilities and sun beds
- is compatible with sensitive materials such as acrylic glass, linoleum, PVC and anodised aluminium
- fulfills the requirement „limited virucidal“ defined by an expert committee of RKI

0280

Fields of application and recommended dilution:

undiluted

Apply to surface by mopping, spraying, pouring and wiping. Surface must remain wet for the entire contact time (1 minute; limited virucidal). Rinse or allow to air dry. Disinfected surface which may come into contact with food need to be rinsed with potable water. Rinsing of floors is not necessary unless they are to be waxed or polished.

The contact time applies to the limited virucidal claim (effective against enveloped viruses including SARS-CoV-2, HBV, HCV, HIV, Ebola virus, all human and animal influenza viruses etc).

Chemical Characterization:

Appearance:

Colorless liquid with saponaceous odor.

Ingredients:

Mixture of disinfectants and surfactants in water.

Free of AOX, CHC, aldehydes and acids.

pH value:

8: neutral
