

## MONIL<sup>®</sup>-STV

Waster Based Stone Protection

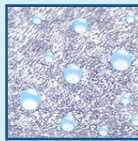

Item no. 4705

### MONIL<sup>®</sup>-STV

- is the ideal protection for mineral surfaces after deep-cleaning with item no. 4700 MONIL<sup>®</sup>-STR
- protects patios, stairs, paving, tomb stones, walls and roofs
- prevents the penetration of water into stone surfaces and frost damage

### MONIL<sup>®</sup>-STV

- is free of hazardous solvents and fluorine compounds
- reduces re-soiling and makes future cleaning easier
- is also suitable for other porous or absorbent surfaces such as wood

## Fields of application and recommended dilution:

### undiluted

Apply **MONIL<sup>®</sup>-STV** undiluted using a low-pressure pumping equipment or a brush. All surfaces must be cleaned to remove all traces of dirt before applying **MONIL<sup>®</sup>-STV**. Allow surface to dry for at least 24 hours. The process should be repeated for highly stressed surfaces. 1 liter is sufficient for approx. 20 to 40 m<sup>2</sup>, depending on the absorbency of the substrate.

The sealing lasts for several months, depending on the exposure. Use only neutral cleaners (e.g. ALL-CLEAN, item no. 2540) for regular cleaning in order to avoid damage to the sealing.

Deep clean surface before re-applying **MONIL<sup>®</sup>-STV**.

A darkening effect of the treated surface might occur after the application.

## Chemical Characterization:

### Appearance:

Milky liquid with mild odor.

### Ingredients:

Mixture of synthetic oils, emulsifiers and preservatives in water.

Free of fluorine compounds, CHC and other solvents.

### pH value:

7: neutral ↴
