

HWR SPENDEREIMER

with fleece wipes (approx. 30x30 cm) to soak

Item no. 8P8100 und 8P8000

Application:

1. Fill bucket with wipe roll
2. Pour cleaning or disinfectant solution over the wipes
3. Pull first wipe through the lid and close it
4. Label your bucket

Wipes can be soaked with 1 to 2 litres of solution. The amount varies, depending on the type of liquid and personal experience. For a safe surface disinfection with alcohol, the use of at least 1,5 litres disinfectant solution is recommended.

Do not use diluted pH-neutral cleaners!

Cleaners and disinfection agents listed below have a shelf life of at least 30 days.

Clean and disinfect bucket before refilling!

Applicable disinfectants and their dilutions:
