

GL 95

Cleaner for commercial glasswashers

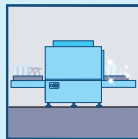

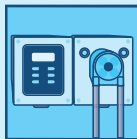

Item no. 2110

GL 95

- is the highly-active additive for machine glass cleaning
- is used in beer gardens, bistros, guest houses, kitchens and canteens
- is also suitable for catering businesses and the beverage industry

GL 95

- effortlessly removes beverage and lipstick residues from glasses
- cleans with little foam and provides a streak- and spot-free shine
- convinces with brilliant results at lowest dosages

Areas of application and recommended dilution:

1:200 – 1:500

GL 95 is well suited for all types of commercial glasswashers and all water hardness conditions. Harmonises ideal with the rinse agents K 20 F (item no. 2140) and K 50 FN (item no. 2145).

Depending on the soiling and water hardness, dose 2 – 5 g GL 95 per litre (0.2 – 0.5 % solution).

Your HWR-partner on site advises you to find the ideal quantity of cleaner in your dishwasher and on our automatic dosage devices.
