

URIN-EX

- is the powerful cleaning gel for all sanitary areas
- removes persistent calcification and urine scale
- especially effective through good adhesion on vertical surfaces

URIN-EX

- is used in urinals, toilet facilities and mobile toilet systems
- in gastronomy, hotel businesses, nursing homes, health resorts
- in public pools, fitness studios and hospitals

Areas of application and recommended dilution:

Pure – 1:3 Basic cleaning of toilets and urinals at regular intervals

Spray the product on toilets and urinals, treat also areas, which are not visible. Due to its viscous consistency URIN-EX adheres for a long time on all deposits like lime, rust or algae and dissolves them slowly. Rinse after 5-10 minutes residence time with fresh water (flush). Treat strong deposits with a brush or repeat the application. Unsuitable for marble and aluminium!

For the maintenance-cleaning, we recommend our sanitary cleaners SAN-PLUS (Item no. 2680), SAN-PLUS fresh (Item no. 2690) or SAN-PLUS extra (Item no. 2700).

Chemical characterisation:

Appearance:

Green, viscous liquid with a scent of passion fruit and kumquat.

Ingredients:

Preparation from surfactants, anorganic acids, corrosion inhibitors, auxiliaries, colour and perfume in water. Free of AOX, aldehydes, chlorine, hydrofluoric or sulphuric acid.
