

ALK-DES

Alcoholic surface disinfection

Item no. 2790

ALK-DES

- is used for disinfection in hotels, catering services and food industries
- is the quick solution wherever germ-free surfaces are required
- shows rapid efficiency against bacteria, fungi and viruses

ALK-DES

- is based on a combination of food-approved active ingredients
- does not contain any harmful substances such as QAV, aldehydes or chlorine
- is well suited for spraying and wiping application

Areas of application and recommended dilution:

pure: Apply ALK-DES undiluted to the cleaned surfaces using a spray bottle or by wiping with a clean cloth and let the surface dry.

ALK-DES dries off completely within minutes and leaves an aseptic surface.

The recommended quantity is 40 - 50 ml/m².

ALK-DES is not suited for acrylic surfaces like Plexiglas (risk of stress cracking). For this purpose we recommend the proven disinfection cleaner SUN-DES (item no. 2730).

Chemical characterisation:

Appearance:

Colourless liquid with a smell of alcohol.

Ingredients:

Preparation of disinfectant active ingredient (alcohol) and auxiliaries in water.

Free of aldehydes, alkalis, chlorine, QAV, AOX and CKW.

All ingredients are biologically degradable.

pH value:

↙ 3.5: slightly acidic

Use biocides safely. Always read the label and product information before use.
