

## MONIL®-FR 3000

Highly concentrated wheel rim cleaner

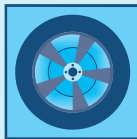

Item no. 4310

### MONIL®-FR 3000

- is used for all acid-resistant aluminium and steel rims
- thoroughly removes soot, dust, oil and road dirt
- dissolves persistent dirt and burned-in brake dust

### MONIL®-FR 3000

- saves working time and costs during cleaning
- is suitable for manual and automatic application
- saves tedious post-processing and protects paintwork, rubber and plastics

## Areas of application and recommended dilution:

1:3 – 1:20

### Manual and machine rim cleaning

Dilute the product and apply it with a compression sprayer, foaming device or brush, let it act for 5-10 minutes, scrub and rinse or jerk off afterwards with plenty of water or use a high pressure cleaner or wash up by hand respectively.

Unsuitable for chromium-plated aluminium rims!

## Chemical characterisation:

### Appearance:

Colourless liquid with a mild odour.

### Ingredients:

Preparation from surfactants, acids, corrosion inhibitors, water soluble solvents and perfume in water. Free of hydrofluoric, hydrochloric and sulphuric acids.

All surfactants are biologically degradable.

### pH value:

√-0.5: strongly acidic
