## HLR-SUPER

High-performance rust dissolver

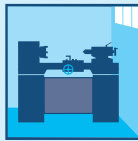

Item no. 5030

### HLR-SUPER

- can even solve those cases, where other products fail
- saves money, time, energy and the cutting torch
- has excellent water displacement and penetrating properties

### HLR-SUPER

- is the quick helper in industry and workshops
- helps to loosen corroded and burnt screws and bolts
- helps treat stiff chains and hinges

## Areas of application:

Releasing and disassembling of seized bolts and threads:

Spray HLR-SUPER on the parts, which have to be released and let it act a few minutes. Release screws with a short and powerful cant (use a ring flat wrench, to avoid the risk of gliding off). You may also release tightened screws near the exhaust pipe, the brakes or the tie rods in most cases, where other products fail.

For the prevention of seize up:

Treat the thread with the special lubricating agent COPPER-LUB 1300 (item no. 5010) and let it act again a few minutes.

## Chemical characterisation:

### Appearance:

Yellow liquid with an oily smell.

### Ingredients:

Preparation from a mixture of mineral oils, spindle oil, MoS<sub>2</sub> and corrosion protecting additives.

Free of AOX and CFC.
