

## Bactoclean®-Toi

Natural malodour treatment for  
toilets and lavatories

Item no. 8530

### Bactoclean®-Toi

- is the highly effective odour eliminator for toilets and urinals
- effectively breaks down the unpleasant odours of urine scale and uric acid
- can easily be dosed manually or fully automatically

### Bactoclean®-Toi

- can be used in many ways in the hotel businesses and gastronomy
- ensures a fresh smell in public buildings, marquees and mobile toilets
- completely breaks down odours into CO<sub>2</sub> and water through microbiological processes

## Areas of application and recommended dilution:

### Sanitary cleaning and toilet hygiene

Apply Bactoclean®-Toi undiluted with a spraying bottle on toilets, urinals and close-by surfaces.  
If the malodour persists during the day, spray again Bactoclean®-Toi on the related surfaces.  
The microorganisms activate themselves within 30 minutes.

### Mode of action

The active microorganisms totally break down unpleasant odours of urine scale and uric acid in an odour-less manner. Competing mechanisms of decomposition resulting in bad odours, will be effectively suppressed. The reproduction of the organisms depends on the availability of nutrients. The efficiency increases with elevated temperature and humidity, when disagreeable odours are especially annoying.

## Chemical Characterisation:

### Appearance:

Blue liquid with a fresh scent.

### Ingredients:

Preparation from surfactants, natural bacterial cultures, nutrients, preservatives, colour and perfume in water.  
All surfactants are biologically degradable.

### Note:

The included natural bacterial cultures are solely conform with genetically not modified, not pathogenic strains of class 1\*. Cultures of yoghurt belong to the same class. Suitable for the application in hotel business and gastronomy.

\* Classification according to the European association of biotechnology (EFB)

### pH value:

8.0: neutral ↴
